New Mammoth® Air- and Evaporative-Cooled Chillers Offer Industry-Leading Quiet Operation

Eden Prairie, MN (April 15, 2010) – Mammoth, Inc. offers air- and evaporative-cooled chillers from 50 to 150 tons with an operating sound power rating as low as 60 dBA within 5 feet of the unit. Units are available up to 1000 tons that have a similarly low sound power rating for their size. This industry-leading sound performance is achieved through the unique application of FANWALL TECHNOLOGY® by HUNTAIR® that minimizes the sound leaving the unit and promotes high efficiency operation. Units are ideal for sound sensitive applications including hospitals, theaters and recording studios, as well as applications with demanding property line acoustic requirements.

Mammoth, Inc., a subsidiary of CES Group, Inc., manufactures innovative custom air conditioning solutions for controlling the environment inside buildings, and in manufacturing processes. Solutions such as: integrated Prefabricated Equipment Centers (iPEC™), ULTRALINE™ Roof-Mounted DX Systems, Packaged Water Chillers, Industrial Air Handlers, V-Cube Slim™ Floor-by-Floor Packaged Self-Contained A/C, Replacement Multizone Rooftop A/C, Water-Source/Ground-Source Heat Pumps, and EPIC DDC Controls. Learn more about Mammoth solutions at www.mammoth-inc.com.

CES Group, Inc. serves its customers from 10 manufacturing locations around the world with over 74 years of manufacturing experience. CES Group can provide innovative, cost-effective, custom-engineered solutions for today's most challenging HVAC applications sold under such leading brands as CLEANPAK®, Governair®, HUNTAIR®, Mammoth®, Temtrol®, Venmar CESTM, Ventrol®, WEBCO™, and Eaton-Williams®.
